📍 Mugla/Turkey

Profile

- Graduate Computer Engineer with a keen interest in technology and a dedication to continuous learning.
- Demonstrated expertise in JavaScript, React, Next.js, Vue.js, Express.js, and MongoDB, with one year hands-on experience in developing robust and scalable web applications.
- Excited to join and contribute to dynamic teams and embrace new growth opportunities.

Professional Experience

Frontend Developer, *Get Software*   Sep 2023 – Apr 2024
                                                                       Mugla, Turkey
- Worked as a frontend developer, collaborated with a team to build modern, up to date web applications, mainly using Next.js, React, and Tailwind CSS.
- Took the initiative to independently code the frontend for 2 projects delivered to a customer, showcasing my ability to work autonomously and deliver high-quality solutions.

Frontend Developer Intern, *Mava Yazilim*   Jul 2023 – Sep 2023
                                                                       Mugla, Turkey
- Collaborated with developers on real-world projects using technologies like Vue.js and Tailwind CSS.
- Gained hands-on experience in building responsive and user-friendly web applications for customers.

- Studied Computer Engineering after completing the English preparatory class.
- Relevant Coursework**:** Data Structures and Algorithms, Software Engineering, Database Systems, Operating Systems, Computer Networks, Web Development.

Computer Science - Erasmus, *Warsaw University of Technology*   Feb 2023 – Jun 2023
                                                                       Warsaw, Poland
- Studied as an Erasmus student at the Warsaw University of Technology, further enriching my global academic experience and acquiring new skills.

Skills

React.js │ Next.js │ Vue.js │ JavaScript │ Redux │ Node.js │ Tailwind │ MongoDB │ SQL

Projects

Eko Trading Bot   Jan 2023 – May 2023
- The Eko Trading Bot is an advanced trading automation tool specifically made for enhancing automatic trading at Binance's Cross and Isolated Margin market.
- Developed as a personal project, it offers a range of features aimed at enhancing trading efficiency and flexibility.
- The bot's main script, tradeBot.js, employs predefined conditions and indicators to execute long or short positions, while additional scripts enable manual trading on both Cross Margin and Isolated Margin markets.

EkoJobs Apr 2024 – May 2024

- EkoJobs is a multifunctional job search platform that provides the user with all the necessary tools to easily find a job.
- Built with Next. js and PostgreSQL, EkoJobs uses a combination of user-friendly interface design with strong backend functionality.

EkoCinema Mar 2024 – Apr 2024

- EkoCinema is a user-friendly cinema app that simplifies the process of browsing local cinemas, exploring movie options, and purchasing tickets.
- Built with Next.js and MongoDB, EkoCinema merges user-friendly navigation with powerful data handling, ensuring a seamless experience and efficient data management.

EkoPortfolio Jan 2024 – Mar 2024

- EkoPortfolio is a web application developed using Next.js. It designed to help users in monitoring and managing their cryptocurrency investments effectively.
- It provides a seamless interface for tracking trades, calculating average prices, and viewing current holdings.

Awards

Google Solution Challenge, *Google* 2021

- Achieved a top 50 ranking in the Google Solution Challenge with our team project "Swapp".
- Received mentorship from Google experts to further develop and refine the project.
